They will then proceed to the Promenade where they will interact with the hedge wall with baseballs.

Following the tour, the music program students will have lunch and seating in a guest suite for the Marlins' 12:10 P.M. game against the Pittsburgh Pirates.

Miami Lighthouse presents a unique, entrepreneurial summer music camp that brings visually impaired students and their sighted peers together for an innovative experience. The camp applies musical skills in a realistic industry environment. Students learn how to arrange various songs in a team-based ensemble environment, participate in performances at popular local venues, write and record their own original compositions, and develop entrepreneurial skills that will be applicable to any career path they choose to pursue.
